To World Health Organization

Adding Trigeminal Neuralgia to the Health Topic List of illnesses will expand awareness, grant access to further resources, and create opportunities for funding and research.

Lack of funding and awareness means there is little accurate data on exactly how many global citizens are currently facing the destructive plight of this illness.

Request Light Up Teal

You can send an email or letter to request light Up Teal or (Lt. Blue) for Trigeminal Neuralgia and Facial Pain Disorders Awareness.. We would be thankful for your authorization to Light up Teal (or Blue) on October 7th. If you're not the main person, could you please forward this request to the individual that provides these sort of permissions?

Light up Teal illumination is important to bring light on education and awareness for those diagnosed with Trigeminal Neuralgia Facial Pain Disorders.

All approvals will be mentioned on TNnME websites, social network sites as well as continuous press announcements, newspapers article, and/or blog posts.

Trigeminal Neuralgia (TN)

One of the most painful afflictions known to medical practice. TN is a disorder of the fifth cranial (trigeminal) nerve. The classic form of the disorder (called TN1) causes extreme, sporadic, sudden burning or shock-like facial pain in the areas of the face where the branches of the nerve are distributed — lips, eyes, nose, scalp, forehead, upper jaw, and lower jaw. Severe facial pain can last from a second to 15 minutes or longer; some individuals may have up to 100 lightning-like bursts of stabbing pain in a day.
